

WHY LOUVERED ROOFS AND WHY SUNDANCE?

As outdoor living has become more popular, products have been developed to make spending time outside more enjoyable. Retractable awnings provide great shade, but poor durability. Traditional wood pergolas are more durable, but not all-weather. Porch roofs are exceptionally durable, but block too much light. The louvered roof was designed to allow for shade when you need it and light when you don't; protection from the elements or refreshing airflow; and great durability. In 2007 our founder started selling louvered roofs and after 11 years we realized many opportunities to improve the design. In 2018 we started manufacturing our own system, which boasts 14 unique selling features that are best-in-class. The Sundance Louvered Roof is strong and durable because of rust-proof extruded aluminum yet beautiful and elegant because of the integrated assembly with the tongue-and-groove ceiling design. The product is manufactured in the USA with a 10-year limited warranty on the structure, and a 5-year limited warranty on the electronics. With unique features and beautiful design we are confident you will love your new roof and the premium outdoor living it provides.

COVERING YOUR
LUXURY OUTDOOR LIVING

MAKE YOUR OUTDOOR SPACE A YEAR-ROUND GETAWAY

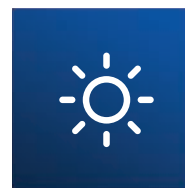

The louvered roof is an elegant and unique patio & deck cover that can open to let in sunlight and close to provide shade and weather protection

SIX WAYS TO TAKE CONTROL

SHADE

Need more shade? Close the louvers with the touch of a button.

SUN

Want more sun? Open the louvers to let in up to 85% natural light.

CLEAN

The louvers are easy to clean. Open 150° to hose off the top-side.

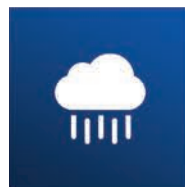

LEAVES

Choose the optional gutter screen to keep your gutters clear.

FLOW

Rotate the louvers to maximize shade and airflow on a hot summer day.

RAIN

Optional rain sensor automatically closes the louvers.

14 ADVANTAGES OF THE SUNDANCE LOUVERED ROOF

- ✓ Larger and deeper gutters with 2 levels of LED light shelves
- ✓ 6 x 6 heavy duty extruded aluminum posts that also can serve as down spouts
- ✓ 2 x 8 heavy duty extruded aluminum beams for longer spans between posts
- ✓ 150° louver opening for easy cleaning
- ✓ Beautiful, designer, heavy duty extruded aluminum gutter
- ✓ Innovative louver spring pins for easy installation
- ✓ Gutter screen ready for keeping leaves from clogging gutters
- ✓ Double skin insulated louvers that reduce heat transfer from the sun
- ✓ Innovative tectonic arch louver design with four structural girders inside and two vertical stabilizers outside allowing longer spans and higher snow loads
- ✓ Esthetically unique flat bottom design for tongue-and-groove ceiling when louvers are closed
- ✓ Gasket used to prevent leaks and give quiet operation when the louvers close
- ✓ Low friction ball bearings extend the life of the louvers and reduce noise when louvers rotate
- ✓ Waterproof motor for any climate with 18 second open/close time for customized shade
- ✓ Customized control for operating louvers

Designed from the ground up, all these advantages will allow you to have a stronger, better looking, and longer lasting louvered roof. However, the most important thing they provide is more outdoor living time for you and your family.
